

SCANBOX

Small format film scanner

SCANBOX

Small format film scanner

Thanks to the proven technology of the predecessor MEMORY telecine, SCANBOX guarantees incomparable digitization quality and delicate film processing.

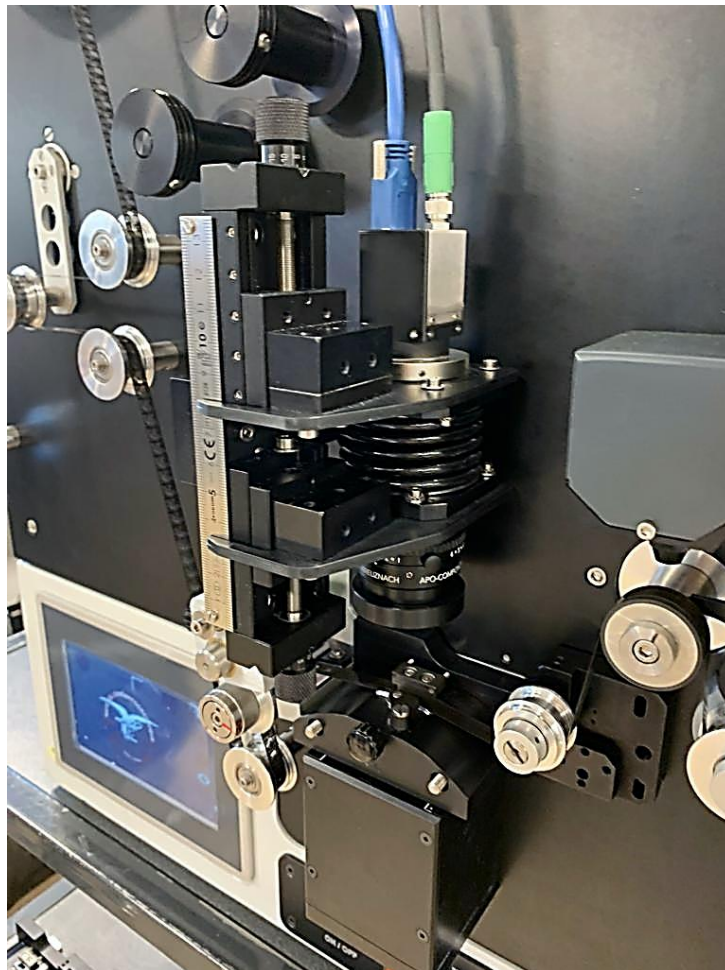

Equipped with in-house developed Kolibri software, a user-friendly tool allowing to operate the scanner easily, SCANBOX provides you with a simple workflow in the framework of the format selection, focusing, image stabilization and color correction.

HIGHLIGHTS

- Multi format: 16/S16 mm - 9.5 mm - 8/S8 mm
- 4K / 2K Resolution
- Sprocketless laser detection of perforations
- Picture stabilization through the perforation analysis
- High-power cold RGB LED source
- 2 in 1: KOLIBRI workstation and software

SCANBOX

Small format film scanner

Types et formats of films

- Negative, internegative, interpositive, positive, C. and B & W
- 16/S16 mm – 9.5 mm – 8/S8 mm

Scanning

- Real-time scanning up to à 50 i/s.
- Low noise camera, progressive mode with Bayer filter
- Resolution 4K (4 096 × 3 000), 2K (2048 x 1536)
- High resolution lens
- Automatic adjustment of format and focus

Film transport and tension

- Capacity 600 meters
- Film is driven by capstan with no sprockets
- Tension regulated by two pressure arms

Lighting

- Trichrome LED Lightning
- Integration sphere for homogeneous light and the reduction of scratches and dust during scanning

SCANBOX

Small format film scanner

Stabilization of the image

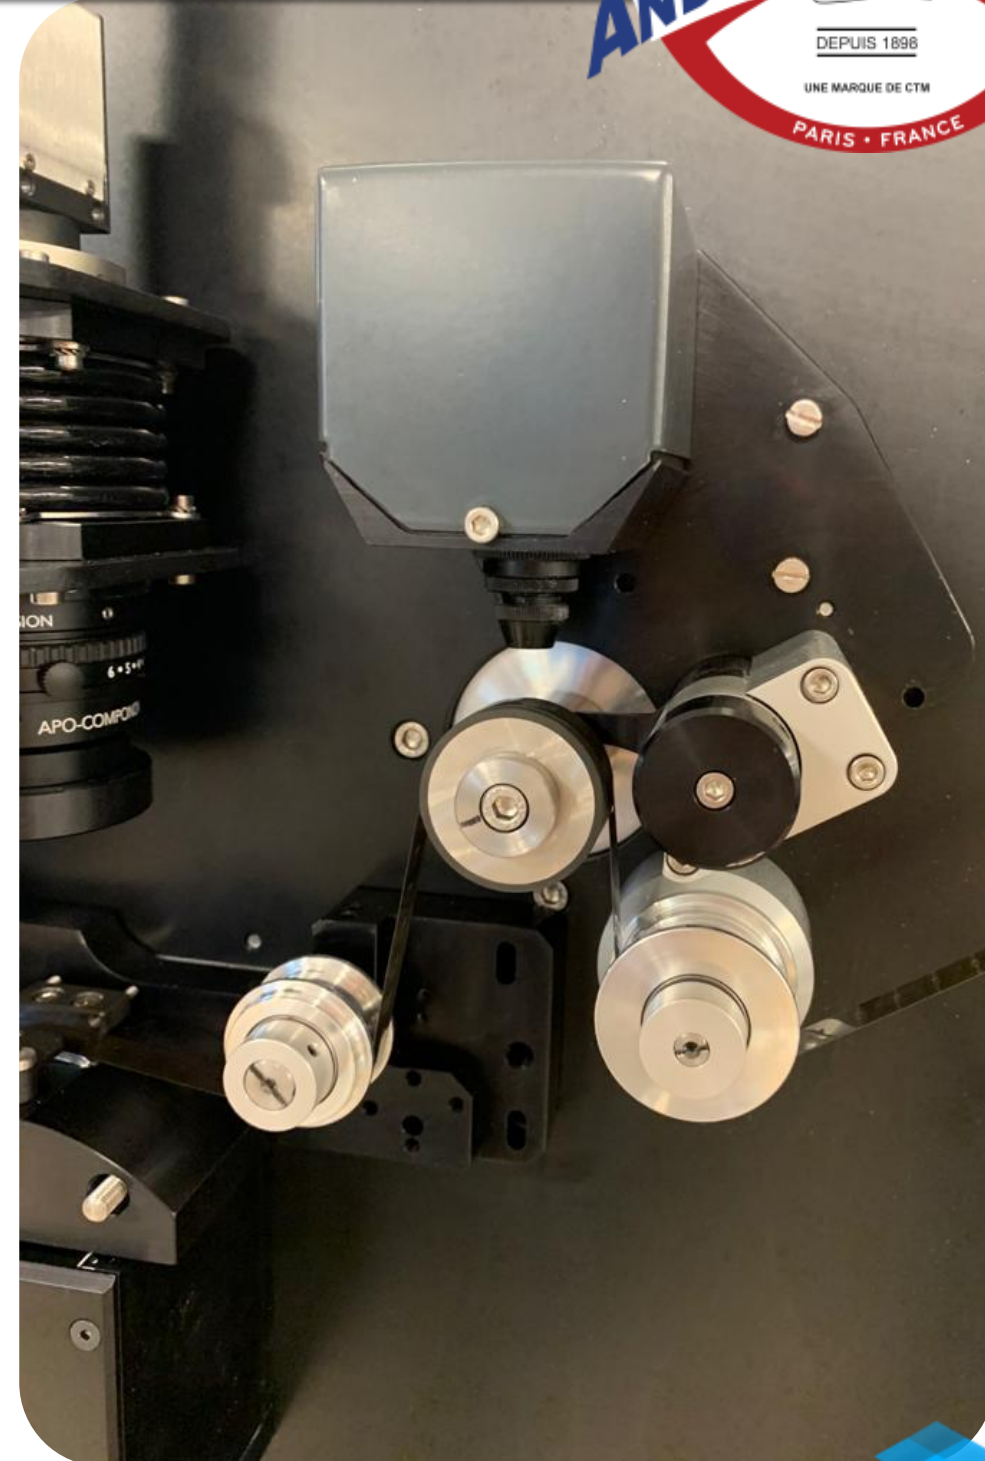

The perforations are detected by a laser. This allows a precise positioning of the image. The absence of a debtor for the detection avoids any risk of damaging the film. Laser detection can handle any type of film with up to 5% shrinkage.

PTRs & Wetgate

- PTR rollers for dirt and dust removal(option)
- Wetgate for scratch reduction (option)

Sound options

- Playback and recording of optical sounds COMMOPT
- Playback and recording of magnetic sounds COMMAG
- Sound amplifier with 2 speakers
- Synchronization with a dual band reader by bi-phase signal

SCANBOX

Small format film scanner

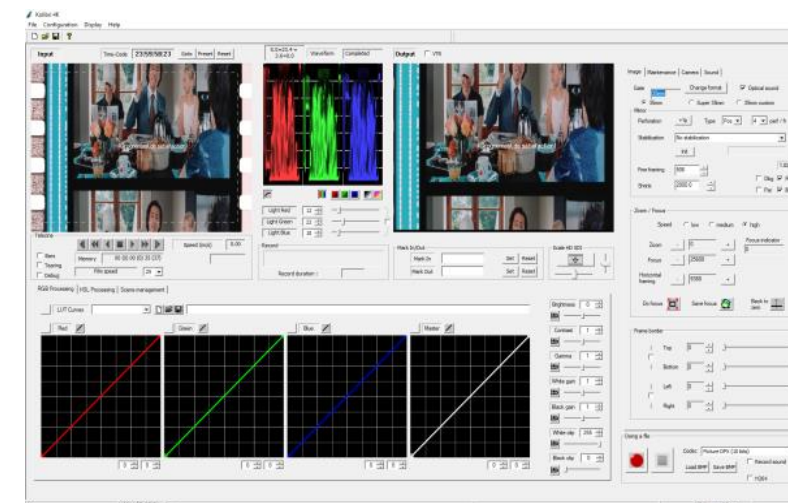

Output formats

Files : RAW, DPX colour ou B&W,
uncompressed AVI, H264, WAV/BMF
Video : 2K, HD-SDI, SD-SDI(option)
Audio : SDI embedded (option)
AES EBU (option), Analogical (option)

Kolibri Software

- Frame by frame scanning
- Automatic white level control
- Live control by Waveform and vector oscilloscope
- Gamma and LUT
- Filter for improving details
- Adjust color saturation
- Cropping, masking, resizing
- Scan speed up to 50 frames per second
- Support for AVID® Artist Color Control Surface
- Scanner operation in local mode via PLC

Workstation

- Multi-core workstation, 64 BIT, Windows10
- 16/9 LCD monitor
- PCIe slot available for Giga Ethernet or fiber channel card
- Internal storage in RAID0 - 12TB
